Professional Summary

Software Engineering (Honours) student at UTS graduating June 2027, with a Data Analytics sub-major and a Distinction average (WAM 81.5). Industry experience across software development, IT systems analysis and API documentation. Builds full-stack applications (Next.js, TypeScript, FastAPI) and trains ML models (TensorFlow, Keras). Sydney-based, available for 2026 and 2027 internship and graduate roles.

Key Skills

Languages: Python, TypeScript, JavaScript, SQL, C++, Java, Kotlin

Frameworks & Libraries: Next.js, React, Node.js, FastAPI, Jetpack Compose, TensorFlow, Keras

Data & ML: pandas, NumPy, Scikit-learn, PostgreSQL, MongoDB, Prisma, Supabase, IBM Cognos, Tableau, Power BI, KNIME; feature engineering, ANN/CNN modelling

Tools & Platforms: Git/GitHub, REST APIs, Microsoft Azure, Vercel, Power Automate, SharePoint, VS Code

Experience

Software Engineer Intern

June 2026 - July 2026

Jio Platform Limited (Enterprise Self-Care Team)

- Documented 5 end-to-end API flows on the JioBusiness portal (SIT) as part of the Agent Development Lifecycle (ADLC), capturing endpoints, request/response schemas, journey stages and error flows.
- Reverse engineered flows from HAR captures, extracting schemas organised by status code with PII redacted, and flagged backend defects hidden by the UI such as 400 status codes under HTTP 200 responses.

Junior IT Support and Systems Analyst

October 2025 - April 2026

Waco Kwikform Group

- Provided Level 1 support across business systems, resolving tickets within SLA and handling onboarding, offboarding and device provisioning.
- Carried process improvements through SQL work, reporting and IBM Cognos dashboards, and managed user access, asset tracking and documentation.

IT Business Analyst Intern

April 2025 - September 2025

Waco Kwikform Group

- Delivered process improvements on three major projects across ERP and project-management systems, covering data analysis, system testing and workflow development.
- Gathered requirements from more than 10 stakeholders across departments to shape process-optimisation work.

Software Development Intern

June 2024 - September 2024

GlobalMedics.ai

- Built an interactive React text editor and a customer-facing AI chatbot on Microsoft Azure, working alongside senior developers across two projects.

Projects

Full Stack Developer

May 2026 - Present

Nooklet | Next.js, TypeScript, Prisma, Supabase

- Deployed a full-stack (Next.js, Typescript, Tailwind CSS, PostgreSQL) social platform to review and log several types of media, with cross-category recommendations and external content providers behind a unified, deduplicated search.

Bot Developer

September 2024 - Present

MiniGames Discord Bot | Python, discord.py, DigitalOcean

- Deployed a bot used in close to 900 servers by over 1,600 registered users, running games including Tic-Tac-Toe, Connect 4, Flag Guesser and more.

App Developer and ML integration

March 2026 - June 2026

Android Hand Gesture Recognition | Kotlin, MobileNetV2, CNN

- Developed a real-time gesture-recognition Android app (Kotlin, Jetpack Compose, CameraX) serving two FastAPI models, a MobileNetV2 transfer-learning model and a from-scratch CustomCNN trained on HaGRID, A/B tested in-app. Team of three.

Backend Engineer

August 2025 - November 2025

Data Analytics Application | Python, FastAPI, MongoDB

- Built python backend in a team of five for an analytics and visualisation tool for CPR Kids, surfacing social media performance, advertisement metrics and bookings.

Machine Learning Engineer

September 2025 - November 2025

Customer Churn Prediction Model | TensorFlow 2.0, Keras.

- Created an artificial neural network predicting churn from 90 days of anonymised telco usage data, with feature engineering, preprocessing and model evaluation.

IT Business Analyst Intern

July 2025 - August 2025

Change Management System

- Developed a company-wide change management system (Power Automate, SharePoint) for Waco Kwikform, supporting dynamic stakeholder approvals. Used by 6 departments to track, review and approve or reject operational changes.

Education

Bachelor of Engineering (Honours), Software Engineering University of Technology Sydney (UTS)

August 2023 - June 2027

- Distinction average (WAM 81.5, GPA 6.17/7); 11 High Distinctions. Sub-major in Data Analytics.
- Selected results: Data Structures and Algorithms (95), Software Development (95), Deep Learning and CNNs (93), Software Architecture (90), Network Fundamentals (92), Machine Learning (86).

Certifications

- Deloitte Australia Data Analytics Job Simulation, Forage (Jun 2025) - data analysis and dashboard creation in Tableau and Excel.
